

Train the Online Trainer

Virtual Facilitation Skills

For facilitators, coaches and trainers

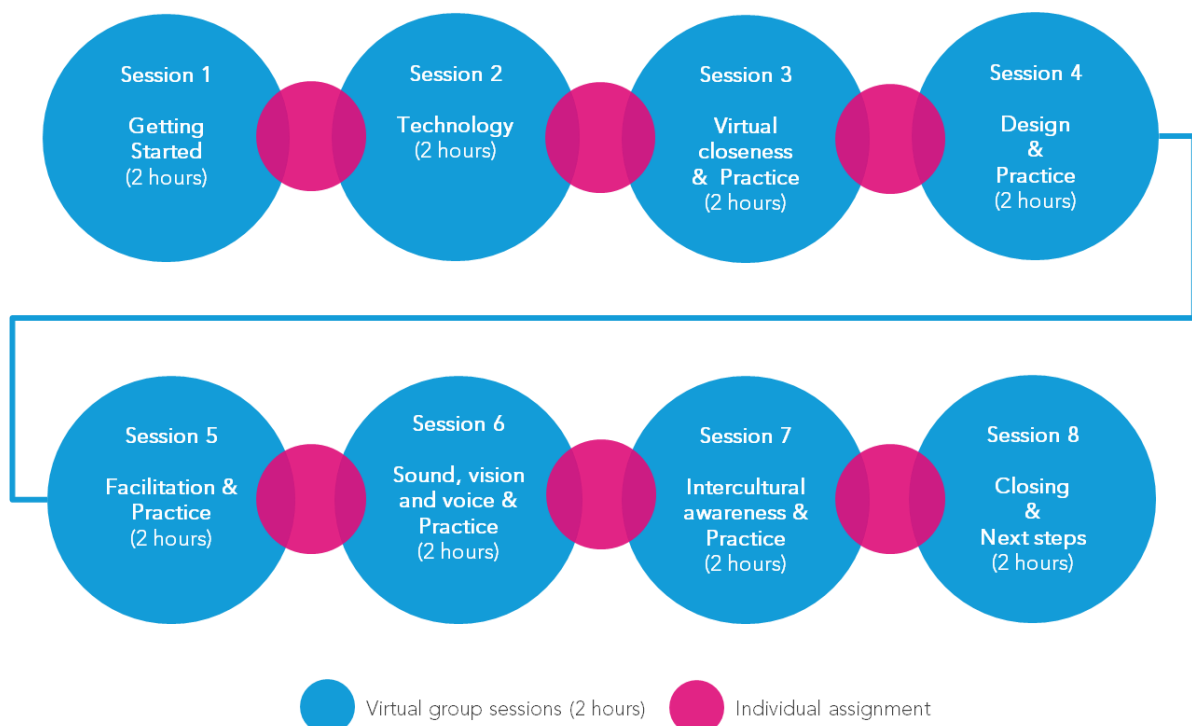

Are you:

- Getting more and more requests from clients to deliver coaching or training virtually?
- Finding yourself doing more and more facilitation and meetings virtually?
- Are you interested in new learning methodology and keen to apply this in your practice?

Why a Train the Online Trainer?

Globalization and technological advancement are rapidly changing the way people work. Working virtually in remote teams is becoming the rule instead of the exception. This new way of working requires a new way of training and coaching. Online facilitation allows you as a facilitator, trainer or consultant to reach all potential clients, regardless of their location. Since 2009, Nomadic IBP has gained considerable experience in the field of online facilitation and has trained over 100 facilitators since.

Programme overview – Train the Online Trainer-

Outcomes

Our programme aims at preparing you to design and deliver online training and facilitation in an interactive way. This means you will learn how to design online training sessions, team meetings, group coaching and webinars that are just as interesting and engaging as those that you deliver in a face-to-face setting. Our vision is that virtual coaching and training can be meaningful, inspiring, impactful and fun. If you deliver one on one executive coaching virtually, you will also benefit from our programme.

Upon completion of this Train the Online Trainer programme, you will be able to:

- Successfully facilitate online sessions in an interactive, spontaneous way
- Design interactive online sessions
- Comfortably handle online training technology
- Apply the tricks of the trade.

An Interactive Approach

The programme is virtual. All content of the programme is delivered in a highly interactive fashion. This means that you will practice extensively. At least half of each session is to gain hands-on experience and you will receive ample feedback from your peers and the trainers. After practicing, participants will receive written feedback from the trainer. In addition to skills practice, the group itself serves as a learning group to experience in the here and now how trust is built virtually. We will reflect on group dynamics and team development as we move through the 8 sessions over the course of 2 months. To ensure that each session will be interactive and engaging, the number of participants in each group will be limited to 10.

Topics

- Differences between face-to-face and virtual learning
- Designing for interactive online learning
- Facilitation in an interactive way
